

Our presenter today is a real-life mentalist.

He's performed in over 30 countries, starred in 4 of his own International TV specials, and is the author of the best-selling book *"Finding Focus In A Busy World"*.

But despite all that, he's still best known as the voice of dozens of animated TV Shows & Movies, including the starring role of Tai in Digimon & various voices in Spongebob Squarepants.

Wow. This is gonna be interesting.
